

DUO BLANK

PRESS RELEASE – 28th April 2012

Duo Blank, a Maltese techno and electronic dance music duo from Malta, have just released their newest studio album entitled 'Propulsion'. The duo consists of experienced dance music producers Edwin Balzan and Frank Cachia. The album will be officially launched during an event which will be held on Saturday 12th May at Prestige Club, Paceville - Malta.

This is the duo's third album and follows last February's release of the single 'Even' which featured Errol Sammut on vocals.

The album features thirteen tracks and is inspired by the duo's eighties synth pop influences. Duo Blank penned their own lyrics and feature Ira Losco, Errol Sammut, Ophidian Twin (Jody Fiteni) and Karen Cachia as session vocalists. The album's song styles range from synth-pop to electro and techno with the general artistic and lyrical theme linked to the heroism of space travelers and the challenges of achieving technological achievements during the highly competitive cold-war era.

Frank and Edwin collaborated with fellow visual artist Yanov Cutajar (screwdogs.com) to develop the various designs which come together with this album and which are not to be missed in the CD Digipak version.

Having debuted with their first studio album entitled 'Hectic Electric' in 1999, the duo had been extensively active in the early turn of the millennium with various international single releases and collaborations. Duo Blank continued also to be active in the local dance music live circuit and have also remixed various local artists.

Although the duo's focus on techno dance music remains, this album should appeal to a wider audience and will be released alongside a new online and live audio visual project (dubbed Live in Kontrol). The duo are also currently collaborating with local video production company 2'Diffused in the preparation of the music video for one of the album's main tracks – 'Stars on Mars'.

The album is available for sale from major local and international music outlets in cd (digipak) and digital download format.
